

SBTi Draft Corporate Net-Zero Standard V2 Public Consultation: Q&A

April 9, 2025

Welcome and housekeeping

English event translated into:

- 1st session:
 - French
 - Mandarin
- 2nd session:
 - Spanish
 - Portuguese

Choose your preferred language using the 'interpretation' button at the bottom of your screen.

A **recording** will be published on the SBTi's YouTube channel.

Speakers

David Kennedy Chief Executive Officer

Tracy Wyman Chief Impact Officer

Emma Watson Head of Corporate Standards

Today's agenda

Opening remarks from the SBTi's CEO

Overview of the Corporate Net-Zero Standard revision process

Q&A session

Closing remarks

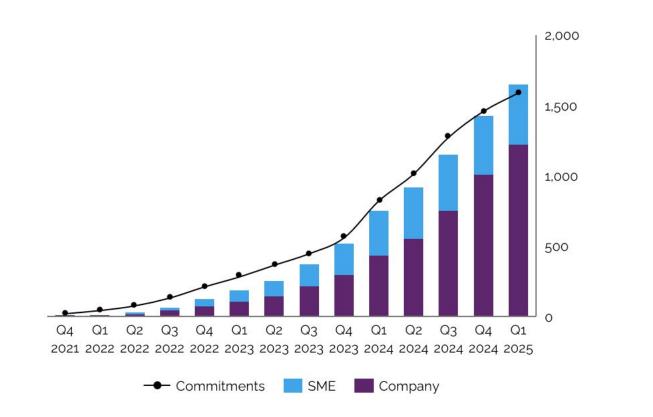

Welcome from David Kennedy, CEO

Updating the Corporate Net-Zero Standard

We have mobilized businesses globally to set credible, science-based climate targets

The standard is undergoing its first major revision after minor updates in 2022 and 2023

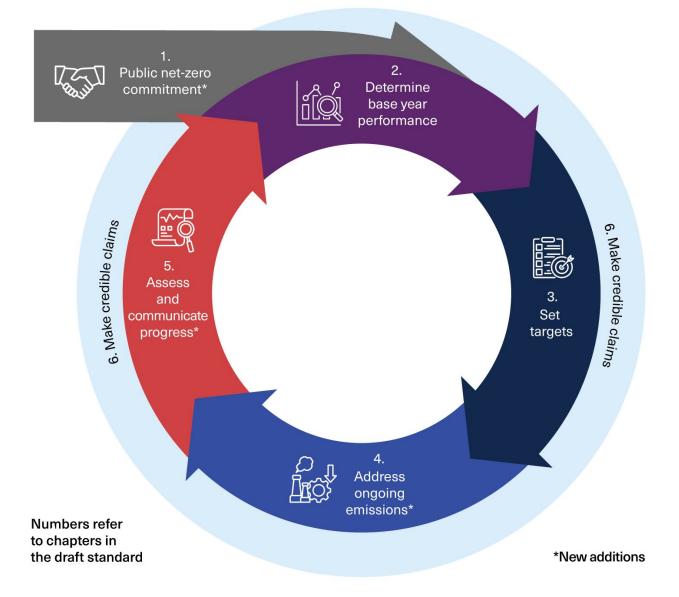

Version 2 will replace the current V1.2 and the <u>Corporate Near-Term Criteria</u>.

The goal is to deliver a science-based, practical framework that drives corporate action beyond 2030, aligning with best practices and the unique challenges businesses face in reducing emissions.

Key changes in consultation draft

The criteria in the standard have been customised by company size and region

Size Location Net annual Balance **Emissions High and** Low and **Employees** Based on World sheet (S1+2) upper-middle lower-middle turnover Bank classification income income \$ or € \$ or € # tCO_e countries countries Large >450M n/a n/a А >1.000 А At least 1 criteria This applies if the HQ is in a low or lower-income country Medium В 250-1,000 50-450M >25M n/a А and the turnover from high or At least 2 criteria upper-middle income countries is <50M (\$ or€) Small At least 2 criteria В В <50M <25M <10.000 <250 and under CO_e threshold

9

Key changes in consultation draft

Increased use of **transition metrics and methods** to supplement emission reduction targets.

Addressing key barriers with **scope 3 target setting** with new boundary approach, clarity and flexibility on substantiation of progress against targets

New proposals on the **role of carbon removals** in the transition towards net-zero.

Recognition of companies addressing the impact of ongoing emissions through BVCM.

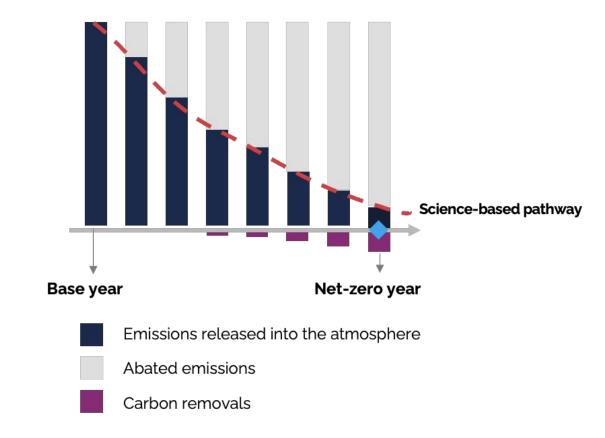

Q&A Session

Q1: What is SBTi proposing when it comes to removals?

Three options for addressing residual emissions

Companies are **required to** set separate removal targets to address projected residual emissions

Companies **recognized for** setting separate removal targets to address projected residual emissions

Companies address residual emissions through **additional scope 1 abatement or removals**

Recognition for beyond value chain mitigation (BVCM)

FROM

Recommendation for

companies to support mitigation outside of the value chain

TO

Recognition for

companies that address the impact of ongoing emissions in the transition to net-zero through BVCM

Q2: What is SBTi proposing when it comes to scope 3?

CNZS V2.0 Four major updates on scope 3

Required scope 3 targets

All Category A companies are required to set scope 3 targets, regardless of their share of total emissions

Updated target boundary

Boundary based on relevance of emissions, rather than a minimum percentage threshold

Greater target-setting optionality

Enhanced use of alignment target-setting metrics and methods focused on outcomes, rather than absolute emissions or emissions intensity

Substantiating progress

Acknowledgment of the use of interventions at the activity pool level and indirect mitigation mechanisms (e.g., book and claim) on an interim basis for emissions with limited traceability

Q3: Why is SBTi sticking to 1.5°C?

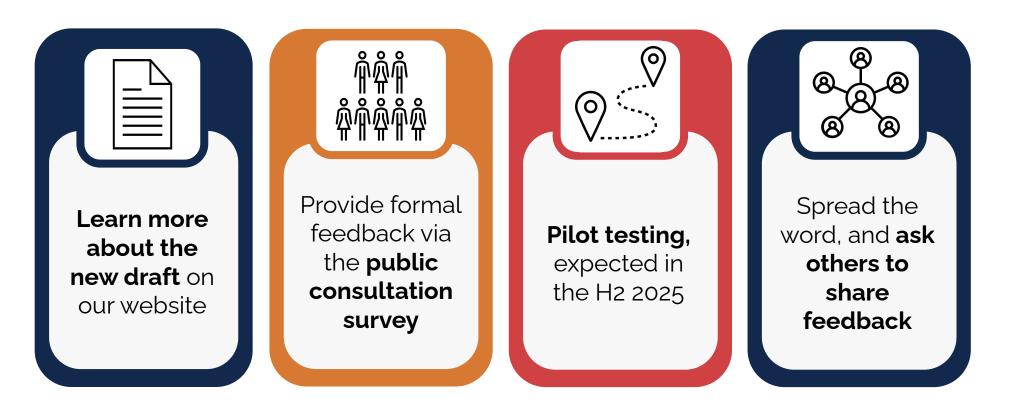

Q4: Why should companies set net-zero targets now?

Q5: How can people get involved in the consultation?

We want your input

Supporting materials to upskill on the draft are available on the SBTi website: digital consultation guide.

Thank you for your questions

There is no time to lose

SCIENCE BASED TARGETS

Your input is essential to making the revised Corporate Net-Zero Standard both rigorous and practical.

Review the draft standard, explore our digital consultation guide, and **submit your feedback by** June 1.

The scale of the climate crisis demands **bold leadership, collaboration, and decisive action** from all of us.

Thank you
